

Classical Latin Pronunciation

Consonants: Most consonant sounds are the same as they are in English, with the following exceptions:

- **C** is always hard (i.e., sounds like "k"), as in the English word <u>c</u>at
- is always hard, as in the English word *g*ood (except when followed by *n*, when it sounds like "-ngn-". *Magnus*, then, is pronounced "ma*ngn*us").
- I can be a consonant as well as a vowel when followed by a vowel, in which case it sounds like the modern letter *y*. The Latin word *iam*, then is pronounced "*y*ahm". The consonantal *i* eventually becomes the modern *j* (notice that "January" comes from *ianua*, "door").
- \mathbf{Q} as in English, always followed by \mathbf{u} .
- **R** rolled or trilled (as in modern Italian and Spanish).
- S like the "s" in "sit", never like "z" in "zero".
- **V** sounds like English **w**: **veni**, **vidi**, **vici** = "<u>w</u>aynee, <u>w</u>eedee, <u>w</u>eekee"

Vowels: most are somewhat different than their sounds in modern English:

```
A short like the a in "<u>a</u>but"; long like the a in "f<u>a</u>ther"

E short like the e in "<u>ge</u>t"; long like the ai in "<u>ai</u>m"

I short like the e in "<u>ge</u>t"; long like the <u>ee</u> in "k<u>ee</u>p"

O short like the o in "d<u>og</u>"; long like the <u>oa</u> in "<u>oa</u>ts"

U short like the <u>u</u> in "p<u>u</u>t"; long like the oo in "p<u>oo</u>l"
```

Diphthongs/Vowel Groups:

```
Ae as in "why," "h<u>igh</u>"

Au as in "h<u>ow</u>," "c<u>ow</u>"

Ei as in "th<u>ey</u>," "<u>ei</u>ght"

Eu sounds like "ay-yoo" (both vowels are sounded)

Oe as in "b<u>oy</u>," "t<u>oy</u>"

Ui sounds like "oo-wee" (both vowels are sounded)
```
